Data and classification governance,
key to semantic interoperability of CRIS systems
in inter-organizational contexts

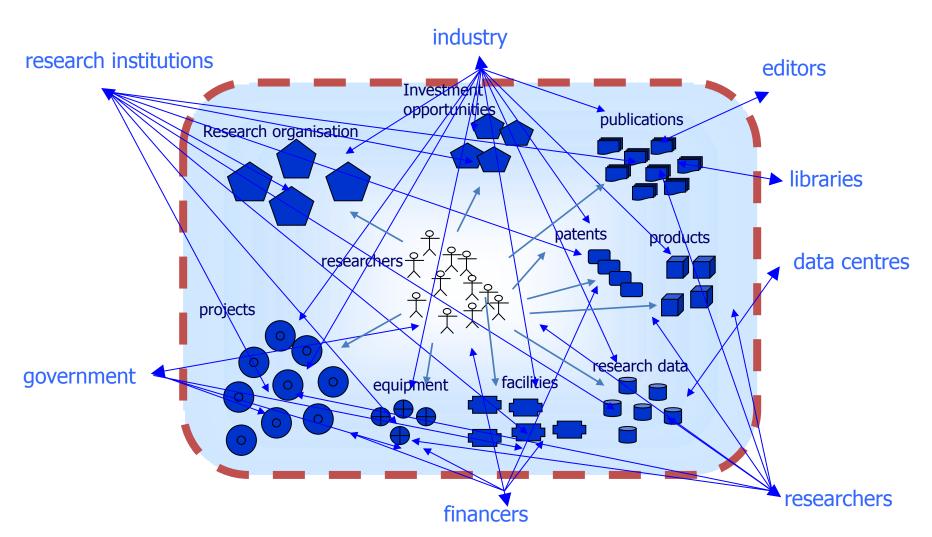

Research Information

CRIS

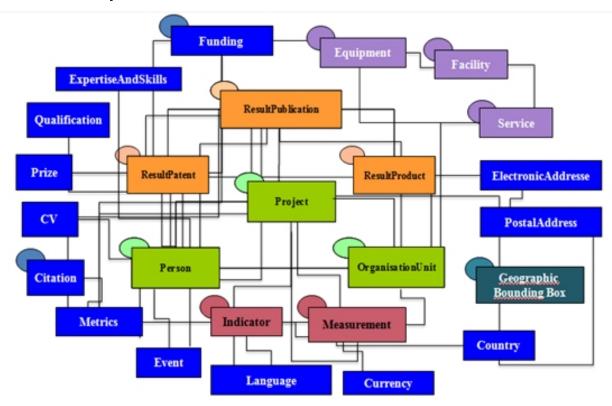

CERIF 1.6

Almost unlimited flexibility for modelling RI

- Base, result, infrastructure and 2nd level entities: 293
- Attributes for metadata and multilinguality: 1814
- Time-stamped / classification-referenced relations: 665

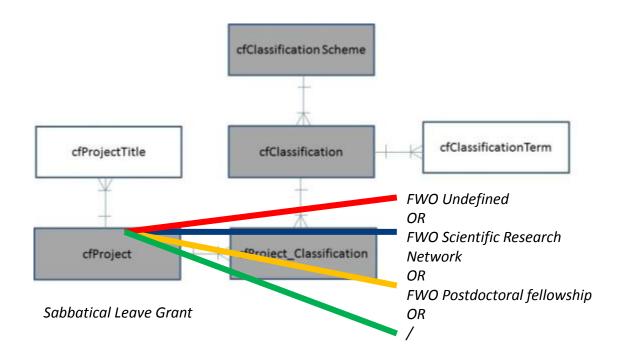

Caveats

- Semantic mismatches
 - Terminology:
 same concepts, differents meanings and vice versa
 → at the inter- and intra-organizational level

CRIS needs & drivers

- Correct, actual, complete research information
 - Maximum reuse of research information
 - By connecting data silo's
 - Reducing system costs
- CRIS services & applications
 - Administrative reduction or research reporting
 - Increased strategic intelligence
 - Efficient & effective policy monitoring
 - More information services

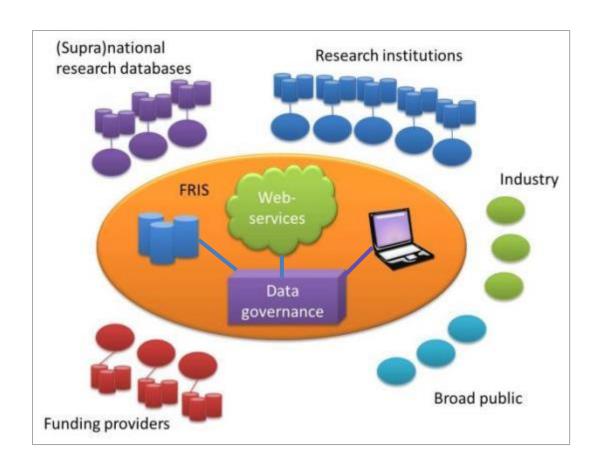

TRUE Semantic interoperability is a MUST

Semantic interoperable CRIS

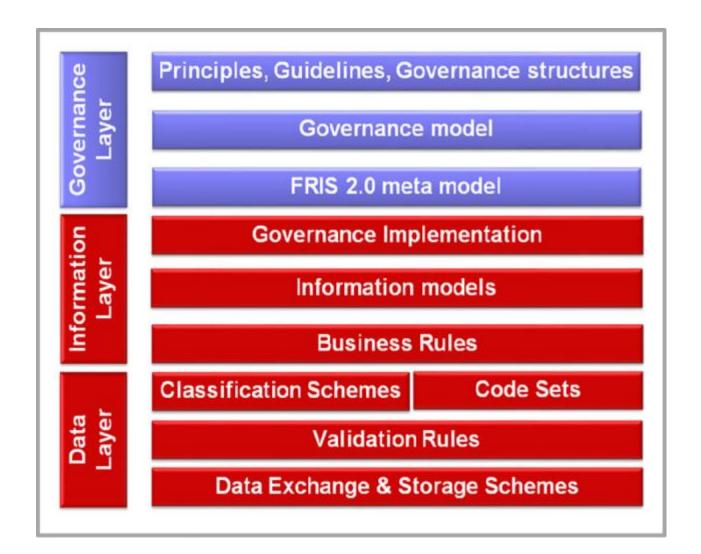

Flanders Research Information Space (FRIS)

1. Installation of a governance structure

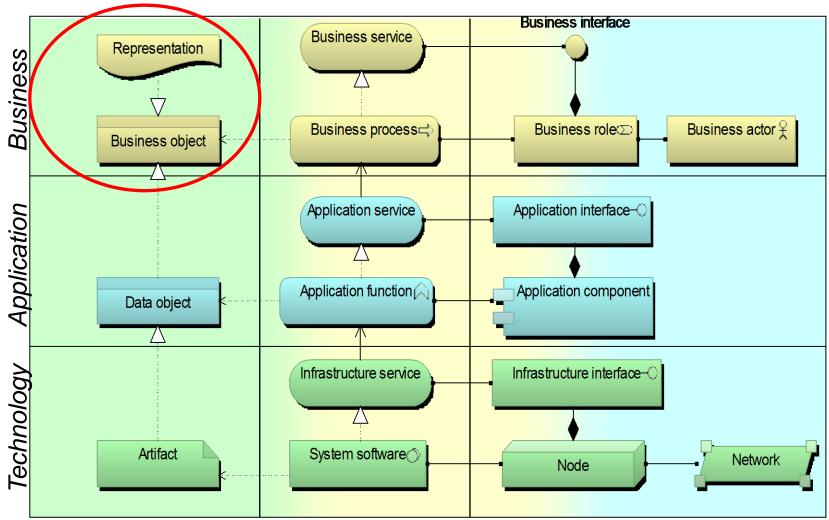

2. Involvement / creation of a business layer

Recording of business concepts and meanings

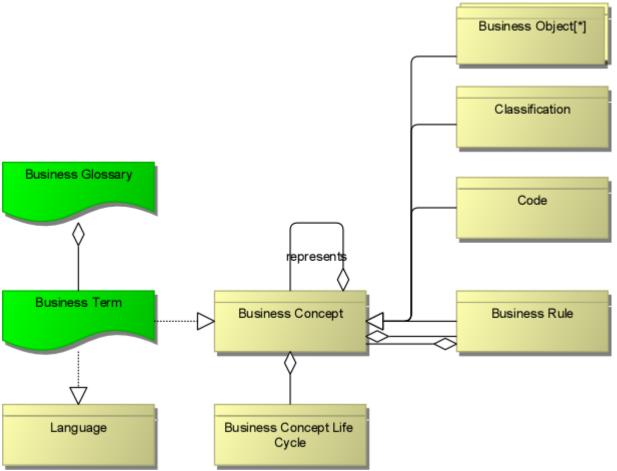

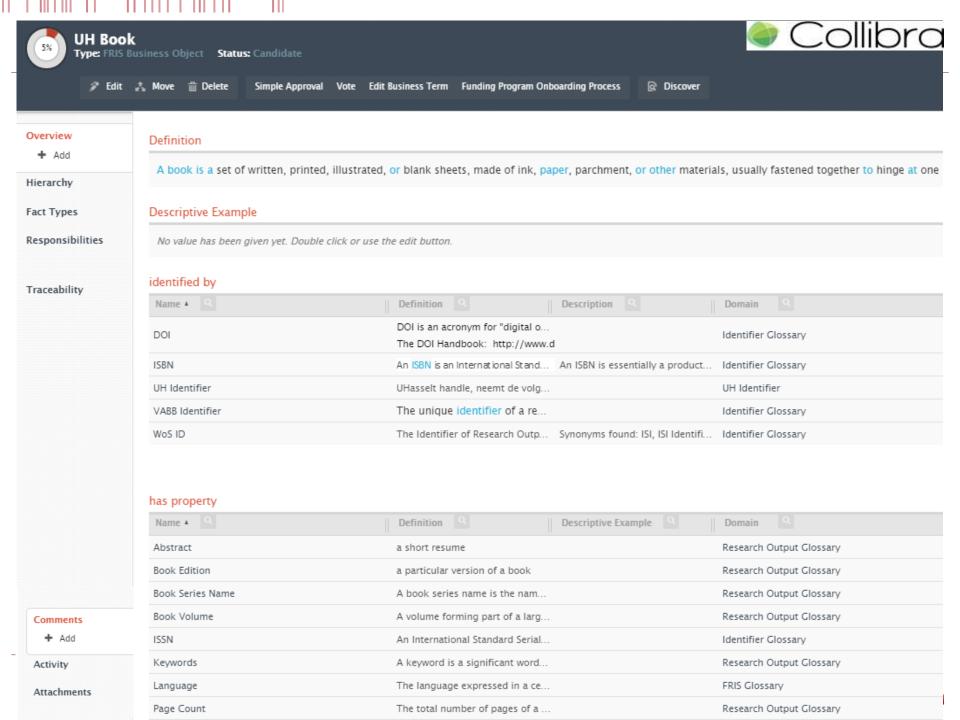

2. Involvement / creation of a business layer

Semantics (not) (yet) in place

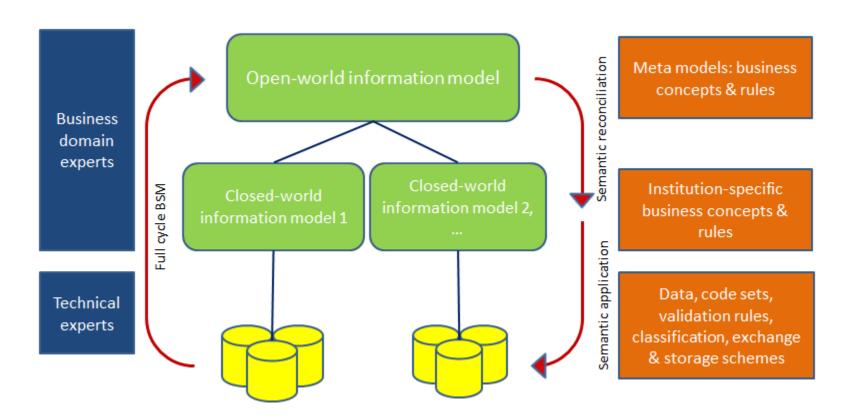

3. Inter-organizational semantic alignment

- Definition of required business concepts on the meta-level
- Collaborative, machine-readable manner
- Full-cycle business semantics management

Classification governance for financial codes

- Research funding:
 - given to persons, projects, consortia,...
 - obtained via many funding sources
 - organisations, programs, grants
 - identified by financial codes classification

- without classification governance:
 - semantic mismatches
 - terminology and meaning
 - decentral maintenance of code lists

Extract Generation 1 financial code list

3800	EU - out of framework - indefinite	01/01/1980	31/12/9999
3801	IMPACT	01/01/1988	31/12/9999
3802	SPRINT	01/01/1988	31/12/9999
3803	TIDE	01/01/1988	31/12/9999
3804	ISC (International Scientific Cooperation)	01/01/1992	31/12/9999

3899	Other EU initiatives out of framework	01/01/1980	31/12/9999

Implementation of classification governance

- Revisiting the financial information model & code list
 - No hierarchy, autonumbering
 - More granularity, in line with reporting obligations
- Governance tool
 - Roles & responsibilities
 - Central maintenance of code lists in DGC, incl. allowed value
 - Semantics and examples
 - Workflows for creating/editing existing codes
 - Full view on remarks & comments
 - Concordance tables
- Automated, collaborative & machine-readable

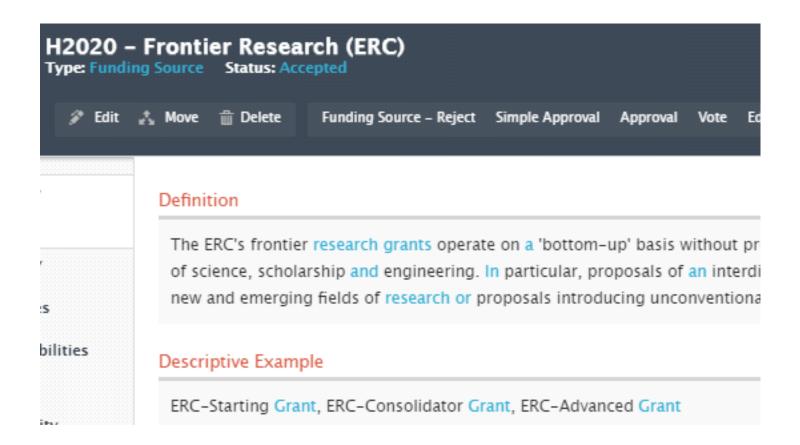

Central maintenance of code lists in DGC, incl. allowed value

Hierarchy 🙏 🖹 🖟 Discover
