FRIS Research portal

Your window to research in Flanders

This preview version of the FRIS (Flanders Research Information Space) Research portal lets you try and test our first release and provide feedback to help us make it even better.

The FRIS Research portal brings a host of new features and changes, including a new search functionality that can be triggered from each page on our web-site, and an [expertfinder](#) where you can browse through a list of classifications to find an expert in your domain.

All information that you'll find was gathered through a direct integration with the systems of the [scientific institutions](#) in Flanders and we are proud to present their information on not only researchers, research groups and publicly funded projects, but also publications from 2008 onwards.

For a comprehensive look at our new search functionality so far, you may want to check out the [search requirements](#).

As a researcher at one of our Flemish institutions you can take part in shaping the portal by test-driving this release version and letting us know what you find. If and when you encounter an issue with regards to your projects or publications that needs addressing, report it to your institution directly by using our [form](#).

Abdominal Surgical Oncology KU Leuven

Responsible: [Baki Topal](#)

Abdominal Surgical Oncology

- Diagnostic and therapeutic animal models of liver metastasis and peritoneal carcinomatosis from colorectal cancer
- Detection of circulating cancer cells in colorectal, liver, and pancreatic cancer
- Gene-expression profiling and proteomic studies in pancreatic, liver, and biliary cancer
- Innovations in minimally invasive surgery for colorectal, liver, pancreas, and biliary cancer

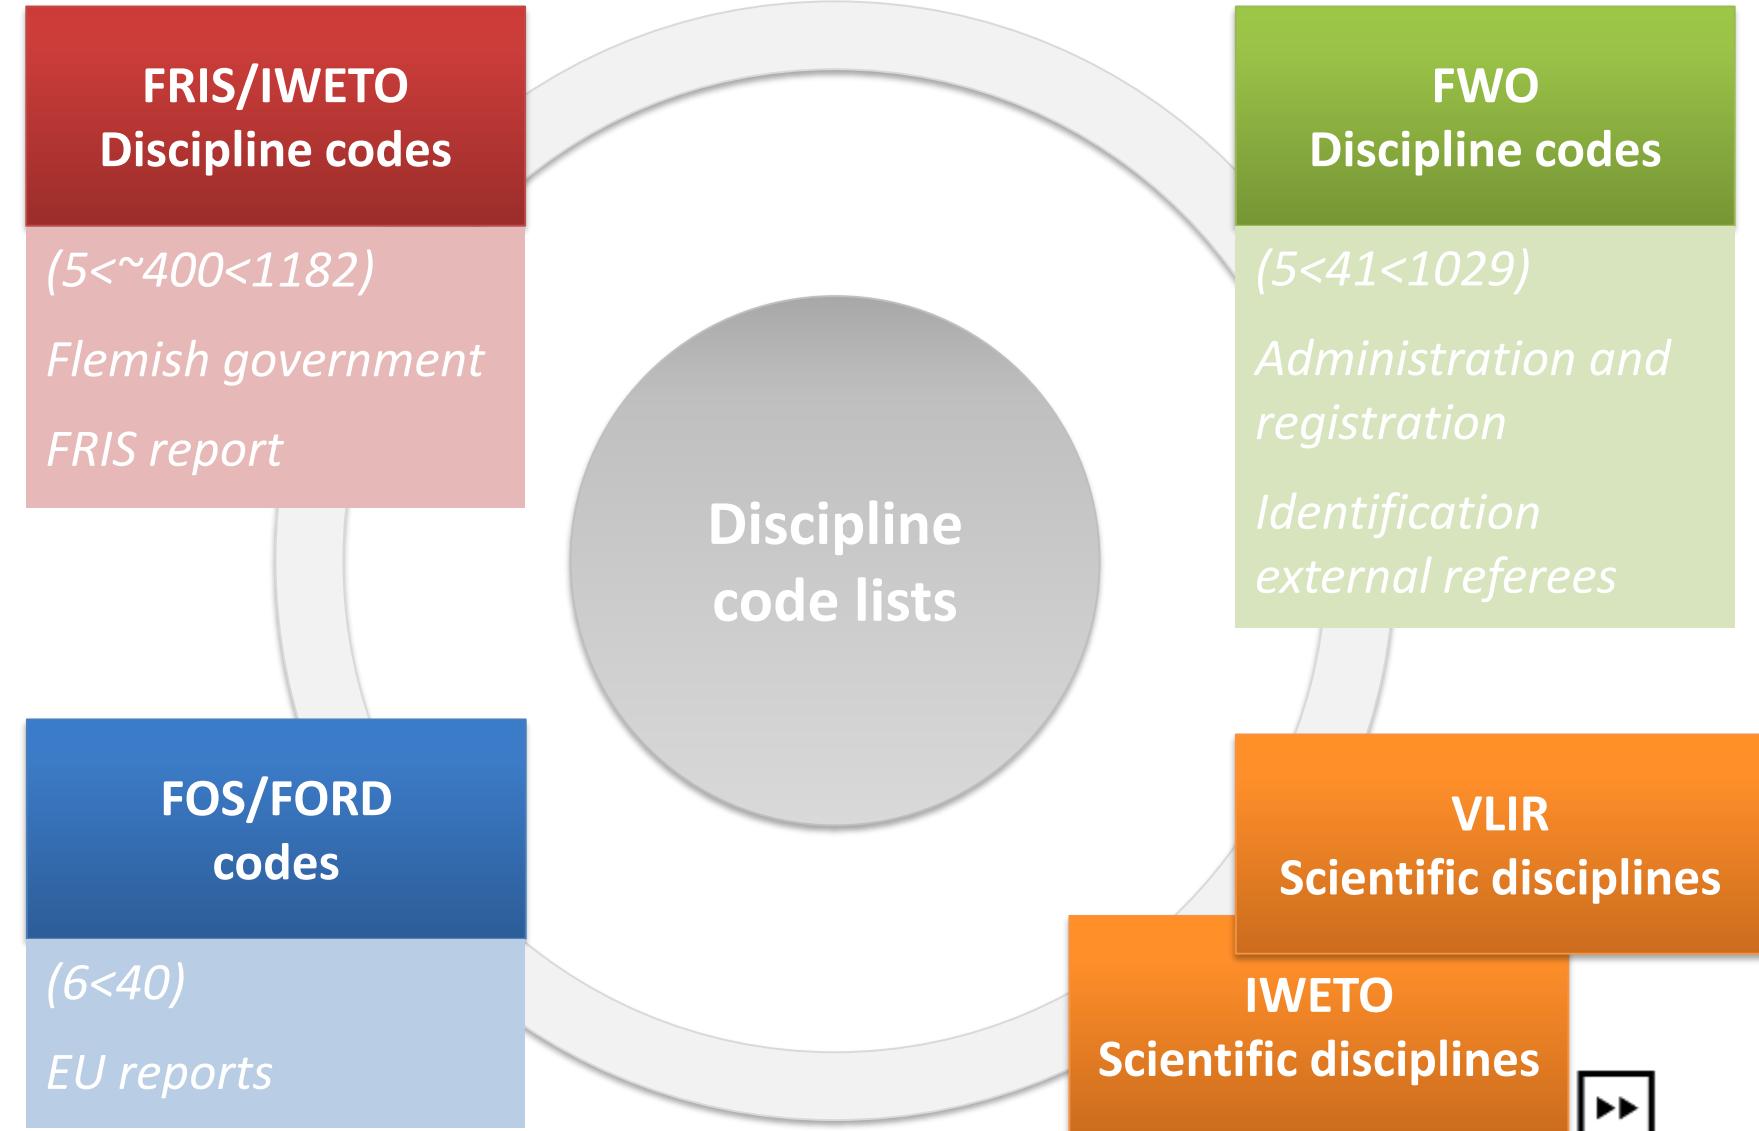

Academic Center for General Practice KU Leuven

Responsible: [Bert Aertgeerts](#)

The department's research is organized within four large programmes with significant interactions between them: development of instruments and outcome measurement, educational research, clinical epidemiology and health care organisation research. It focusses on a broad range of clinical situations with care for the elderly and diagnostics as its corner-stones. 1. Instrument development and outcome research Together with 11 other institutes ...

Overview

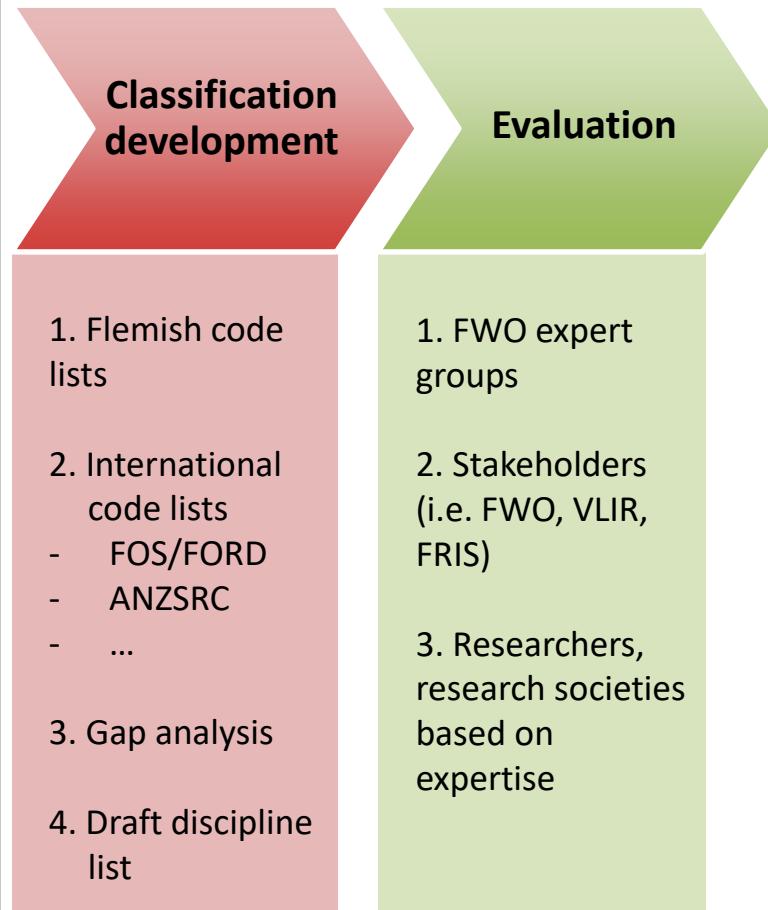

ECOOM-UH: uniformisation discipline code lists

Goals:

1. Creating a single Flemish classification for research disciplines that:
 1. covers all research in Flanders
 2. provides a semantic definition for all disciplines
 3. provides concordance maps to the most prevailing (inter)national classification systems
2. Implementation of the Flemish research discipline code list by Flemish agencies and stakeholders
3. Classification governance and quality control

Procedure

Flemish research discipline code list v°2018

▪ Specifications

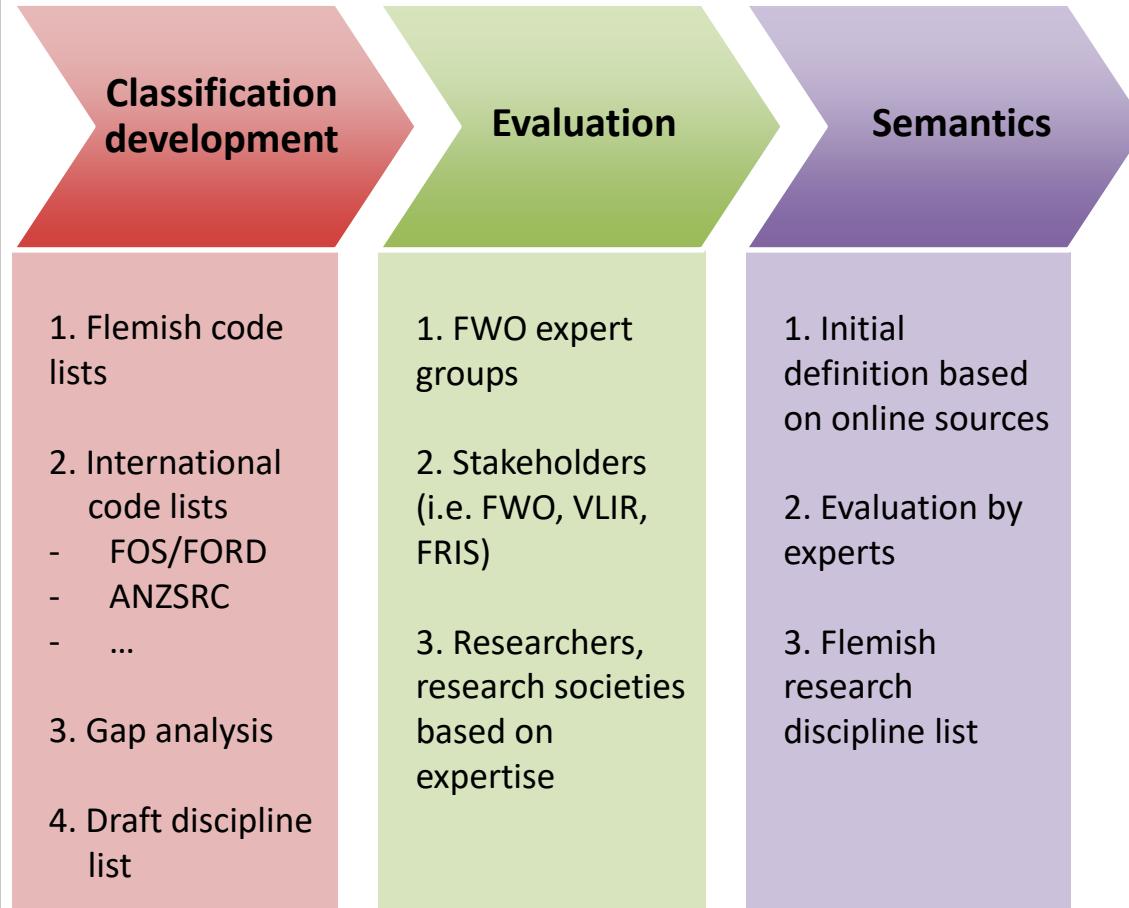

- 4 levels

- Level 1: 7 codes
- Level 2: 42 codes
- Level 3: 382 codes
- Level 4: 2866 codes

Procedure

Implementation

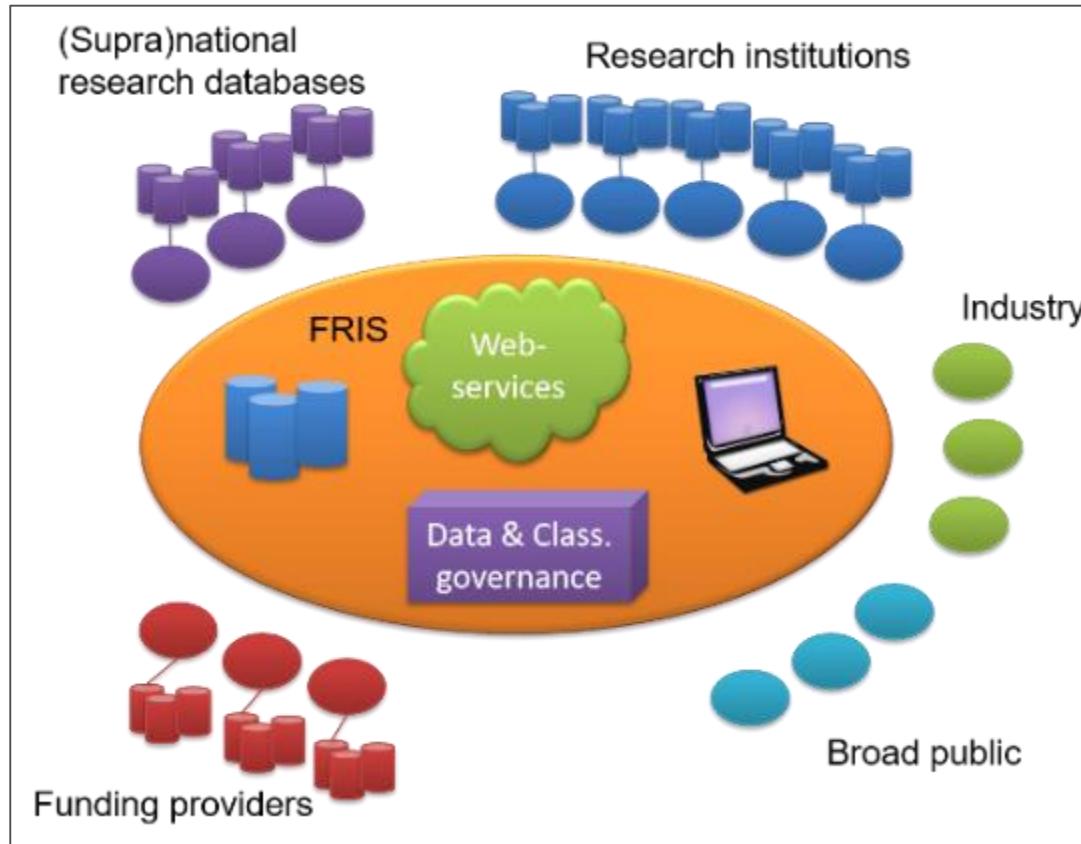

Implementation

- Business-related issues
 - Define the granularity level
 - Persons
 - Projects
 - Organizations
 - Drafting business rules
 - Revision and/or optimization of business processes
 - Concordance schemes
 - 1-n mapping
 - Revision of research reporting obligations (and legislation)
- Technical-related issues:
 - Integration in webportals (filters/search applications) & data-systems
 - Receiving updates via SOAP-services
 - Concordance schemes
 - Automated mapping (1-1)
 - Drafting validation rules

Steering group meetings

- Universities, higher education institutions, research institutions, strategic research centres, funders, Flemish government, ...

Funding agency ex. FWO

The screenshot shows a web interface for managing academic disciplines. On the left, a sidebar lists various categories: Personalia, Familiale gegevens, Diploma's / Huidige studies, Functies / loopbaan, Disciplines (which is selected and highlighted in orange), Publicaties, Contactgegevens, Wachtwoord wijzigen, and Download PDF van alle gegevens. The main content area is titled 'Disciplines' and contains a search bar with 'Zoeken' and 'Alles tonen' buttons. A tree view of disciplines is displayed, starting with 'Engineering and technology', which branches into 'Mechanical and manufacturing engineering' and 'Thermodynamics'. A callout box highlights the definition of 'Thermodynamics': 'Thermodynamic processes is the research field studying the energetic evolution of a thermodynamic system proceeding from an initial state to a final state in the context of mechanical and manufacturing processes and technologies.'
