Working on a PhD is often a lonely journey. Nevertheless, it is also the result of numerous interactions with many people. I would like to take the opportunity to explicitly thank a number of these people that have contributed to this study in many ways.

I would like to thank my supervisor Prof. dr. Paul Matthyssens for giving me all the freedom in undertaking this scientific quest. Furthermore, I thank the jury: Prof. dr. Felix Corthouts, Prof. dr. Peter W. Liesch, Prof. dr. Pieter Pauwels, Prof. dr. Gilbert Swinnen, Prof. dr. Koen Vandembemt, Prof. dr. Rob J.M. van Tulder for their critical but motivating remarks.

I also want to express my gratitude to all the interviewees that were prepared to engage in this study. Except for providing me with data for my study, they also passed on their enthusiasm and fascination for international logistics.

Moreover, I want to thank my colleagues at the Limburg University Center. Over the years I found myself embedded in many warm networks that encouraged me to carry on and conclude this work. Special thanks goes to Sabine, Marc, Lieven, Wouter, Malaika and the rest of the gang for a nice cooperation and relaxing breaks; Piet, Peter and Frank for the numerous stimulating discussions; and the wonderful secretaries that were always prepared to help me.

With respect to the home front, I owe a big “thank you” to my family for their never-ending assistance and encouragement. Moeke en pa, Toon en Elke, Stijn en Griet, Vanhoofkes, merci ! Furthermore, I would like to thank my friends for their warm support. I especially think of the Mambo Rockers, Veerle and Kurt, Sabine and Lode, Rebecca and Wim, Hilde and Wim, Gisèle and Rob, and Johan and An.

Hans, you shared the good and the ugly times. Thank you for being your steady you. And finally, I thank my son Jasper. He provided me with a strict deadline and the best reason to finalize my work. The summer never looked so promising...
